

Handy's body is made of high-strength plastic, extremely solid, it fits well in the hand, it is not too bulky or too heavy. It is not a simple novelty or a poor quality toy good for a few months, **Handy** will last you a long time.

Its mechanism is invulnerable; solid, well thought out with a brushless motor (or otherwise says, it runs on direct current); basically a brushless motor is stronger, more durable, doesn't heat up, and it is less noisy while allowing higher speeds.

I can't say it's noisy, but I can't say it's totally silent, its noise level is acceptable.

Handy's Going to Last You a Long Time...

It also has the option with virtual reality glasses. I insist, note that the device works just as well without WIFI, WIFI being an additional option. Please note that your **Handy** is constantly evolving, as updates are automatically made on the device from time to time when you connect it to WIFI, adding more fun options.

"By the way, I didn't find it easy to connect it to WIFI, but once we got there, I must admit that an XXX film transmitting the movements in the **Handy** brings us much closer to reality."

WI-FI SETUP

SEE/CHANGE CONNECTION KEY

USE REMOTE FUNCTIONS

LED INDICATOR STATUS CODES

It's a bit confusing at first with its activation buttons, but after a few minutes you get used to it. It plugs into the wall on 110v offering a constant force and finally no need to connect it to your phone or computer for it to work, it is self-sufficient.

On the other hand, for more options it also connects to your phone or computer, it has the WIFI option and allows you to vary the pleasures by controlling it remotely and have access to XXX movies that synchronize with it, yes the movements in the movies are imitated in the **Handy**.

The length and speed of the masturbatory movement can be adjusted to your taste:

- The number of masturbatory movements: 1 per second up to 10 per second.
- The length of the masturbatory movement can be adjusted to your taste: short movement of 3cm (1,18") or long movement of 11cm (4,33").

Grip, Power...

HIGH TECH

and Speed!

Characteristics

Power supply: It runs on 110v for a constant force.

Sleeve size: one-size-fits-all penis shapes and lengths

Motor: brushless and unstoppable

Synchronization: Mimics gestures in XXX adult movies (exclusive selection)

Maintenance: cleans very easily

Wi-Fi: intelligent WIFI control

Performance: dual-core processor

Virtual reality: ready for virtual reality (glasses)

Internet Compatibility: controllable via the Internet

10 different sensors for device stability:

4 X magnetic field sensors

2 X heat sensors

2 X infrared sensors

1 X safety detection sensor

Dimension:

23cm (10,5") in length and 7cm (2,75") in diameter

Handy is available in all adult stores, look for the packaging and ask for it by name!

Handy #SD1000

masturbator

**MASTURBATION
Like the Real Thing,
a Completely
Natural Experience!...**

Handy™ was created and built by Norwegian engineers, who are disciplined and passionate about their work.

For the first time in the industry, we're offering you a real back and forth motion device, every move will stroke you with great power... and as they say: "You're Gonna Come" and without having to make any movement by yourself we might add!!!

When you receive your **Handy**, here's what's in the box:

- The Handy
- Power supply module
- Cable and electrical transformer
- The sleeve
- Instruction manual in French and English

**"You're
Gonna
Come!"**

Sylvain's Opinion...

I've been working in the field since 1979, I'm Sylvain I've seen my fair share of men masturbators and none of them, I mean none of them, had a real back and forth movement, as well as the strength of the **Handy**... I'm telling you, it's tireless, and it's a foolproof mechanism.

The ejaculation is mixed with a sensation of intense heat and friction and the reason is quite simple: it fits perfectly to any penis size, it's like penetrating into the exact orifice you need, it fits you instead of you having to adapt to it. In addition, many existing masturbators attach themselves to **Handy**.
