WHAT IS IT?

Rabbits are, by far, the most commonly owned vibrators – but according to research, women aren't actually using them. These vibrators don't seem to deliver on their dual-stimulation promise because the "rabbit ears" lose contact with the clitoris with each thrust. Based on these findings, We-Vibe's team of designers created Nova as an improvement on the classic rabbit vibrator design. Now, through extensive user testing and development, Nova's novel design has been taken to the next level in the form of Nova 2.

The new and improved Nova 2 offers non-stop pleasure, even during your wildest moves. Nova's external stimulator flexes with you to keep constant contact with the clitoris, while the internal G-spot stimulator is adjustable to fit your unique body – constant contact, non-stop pleasure.

WHAT SETS NOVA 2 APART?

1. Experience an explosive blended orgasm through dual stimulation.

Experience a blended orgasm with Nova 2 – the rumbly vibrations, constant contact with the clitoris, and G-spot stimulation lead to next-level sensations.

2. Adjustable to fit your unique body.

Nova's internal G-spot stimulator is adjustable to fit your unique body so you can feel the vibrations right where you want them. The shape is easy to adjust, then stays in position once you've found the perfect fit.

3. Ergonomic and easy-to-use.

Nova's ergonomic handle makes the experience more comfortable than ever, while the design of the product ensures you won't have to reposition the stimulators with each movement.

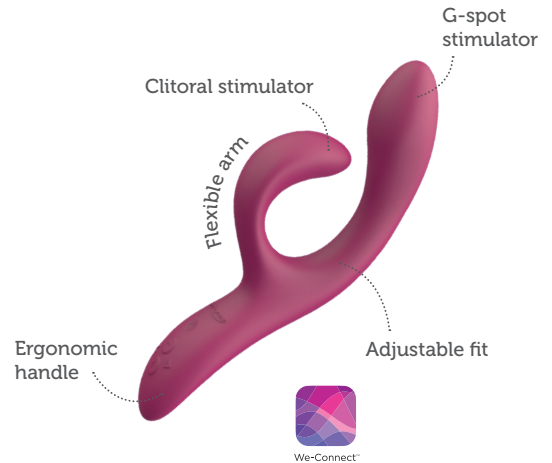

4. Play together, even when you're apart.

With the free We-Connect™ app you can play and share control of Nova 2 from anywhere, create custom vibes and play together with other We-Vibe products.

WHO IS IT FOR?

Nova 2 is for customers who are already familiar with the rabbit vibrator category but want to try something that's different or more premium.

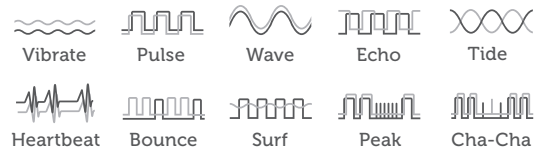

Nova 2 is an intriguing option because of its approachability, sleek design, user-friendly flexibility and adjustability. Couples can use Nova 2 to add a new spark to their play, or they can use We-Connect™ to play together over long distance.

FEATURES

- Adjustable fit
- Ergonomic handle
- Flexible arm
- Dual stimulation
- Waterproof
- We-Connect™ app compatible
- USB cord with magnetic charging pins
- Run time: 120 minutes
- Charge time: 90 minutes
- Body-safe silicone
- Travel lock
- 10+ modes

VIBRATION MODES

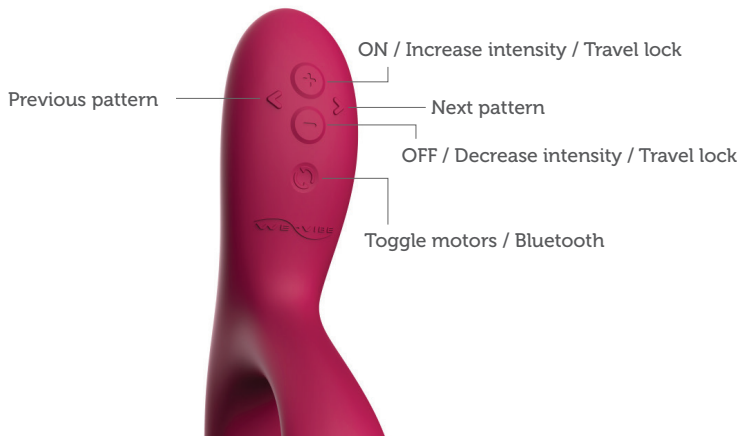

+ create your own mode with the We-Connect™ app.

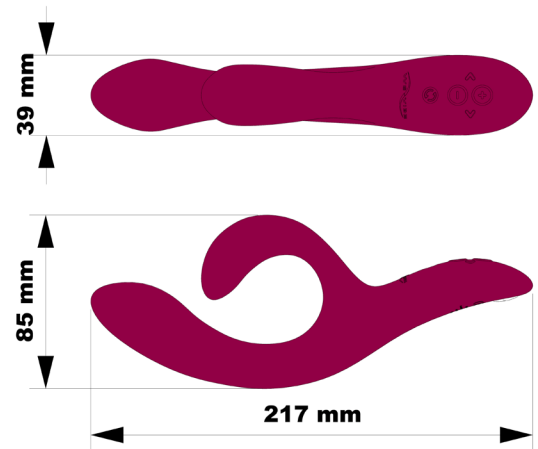

WHAT'S IN THE BOX

USER INTERFACE

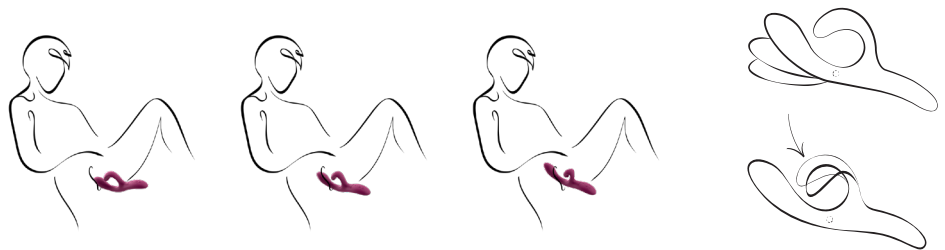

DIMENSIONS

HOW TO USE

Insert the internal G-spot stimulator into the vagina and rest the external clitoral stimulator on the clitoris.

The curved part of the stimulator stays on the clitoris and flexes with each movement. Using the buttons, adjust vibration mode and intensity and choose whether the internal motor (G-spot stimulation), external motor (clitoral stimulation) or both (dual stimulation) are running.

HOW TO DEMO

- Introduce Nova 2 to the customer. Explain how the design and functionality go beyond a classic rabbit vibrator.
- Demonstrate Nova's adjustable fit. Explain that the adjustability of the G-spot stimulator lets the user find the perfect fit for their body. Once the preferred fit is found, Nova 2 will stay in position.
- Demonstrate with your hands how Nova 2 is used. Emphasize the flexibility of the clitoral stimulator.
- Turn Nova 2 on and demonstrate the rumble vibrations and patterns. Hand Nova 2 to the customer and have them feel the vibrations in their hands. Note that the vibrations are quiet.
- Explain how Nova 2 is turned on and off and how the vibration modes and intensity levels can be changed using the buttons on the device.
- Note that Nova 2 is 100% waterproof and can be used underwater.
- Pair Nova 2 to the We-Connect™ app and demonstrate how Nova 2 can be controlled from across the room or from across the world.
- Highlight We-Vibe quality — body-safe, rechargeable, 2-year warranty.
- Note the magnetic charging contacts and the rechargeable feature and demonstrate how the charger securely fastens.
- Explain that in order to preserve battery life, Nova 2 will enter sleep mode after 30 minutes of inactivity — including periods with no changes to your vibration patterns or intensity levels. Update this setting in We-Connect™ to keep Nova 2 on standby for up to 4 hours by going into Settings > We-Vibe Sleep Timeout.
- Demonstrate the travel lock by pressing the plus and minus buttons simultaneously for 3 seconds to activate the travel lock. This ensures Nova 2 won't switch itself on accidentally. The travel lock is automatically deactivated when the toy is recharged, or by pressing the plus and minus buttons for another 3 seconds.
