

How to pair products to We-Connect

We-Connect is the app that brings couples together™. Play together, even when you're apart. We-Connect lets you connect and control your We-Vibe products via the app, whether you're in the same room or on different continents.

We-Connect is great for long distance couples, tech-savvy consumers and partners looking for something new and exciting to try.

We-Vibe

Instructions

Chorus

Please note that you must first pair Chorus to the Squeeze Remote before connecting to the We-Connect app.

Pair Chorus to remote

1. Press and hold the control button on Chorus for 10 seconds (Chorus will pulse twice — continue holding the button until the light flashes 3 times).
2. Press and hold the “+” button on the remote until Chorus pairs to the remote (Chorus will pulse 3 times once paired).
3. Press any button on the remote except for the function button (top button with the wave) to feel Chorus respond. If Chorus responds, the remote is successfully paired to Chorus.

Pair Chorus to We-Connect:

1. Press and hold the control button on Chorus for 5 seconds (until it pulses twice).
2. You can then begin the pairing process within the We-Connect app.

You cannot pair Chorus to the We-Connect app without the Squeeze Remote. Chorus uses AnkorLink™ technology to create a stable connection between Chorus and the app, and the Squeeze Remote is the anchor between this connection. Make sure you keep the Squeeze Remote close by when using We-Connect.

Wand

Pair Wand with your smartphone. Hold down Wand's power button for 5 seconds. The LED will start flashing. You can then begin the pairing process within the We-Connect app.

Melt

Pair Melt with your smartphone. Hold down Melt's + button for 5 seconds. You can then begin the pairing process within the We-Connect app.

Users may need to remove Melt from the Bluetooth settings on their phone. Once removed from the Bluetooth list, reset Melt by pressing and holding the + button for 10-15 seconds. Once reset, you can pair Melt to the We-Connect app by clicking on “Connect toy” within the app.

Moxie

Please note that there are two versions of Moxie:

Moxie Blue with New Firmware 0x22 (all other serial numbers)

This Moxie implements pairing mode. To pair Moxie to We-Connect, Press and hold the control button for 5 seconds. The LED will start flashing when Moxie is in pairing mode.

Moxie Blue with Old Firmware 0x16: Serial No (50000000 – 50111498)

This version implements whitelist. Users may need to remove Moxie from the Bluetooth settings on their phone. Once removed from the Bluetooth list, reset Moxie by pressing and holding the control button for 10 seconds until the LED flashes rapidly 3 times. Once reset, you can proceed to pair Moxie to the We-Connect app by clicking on "Connect toy" within the app.

Moxie Blue with New Firmware 0x22 (all other serial numbers)

This version implements pairing mode. To pair Moxie to We-Connect, Press and hold the control button for 5 seconds. The LED will start flashing when Moxie is in pairing mode.

If you are trying to pair Moxie to your smartphone with the We-Connect app and are unsuccessful, Moxie may already be paired to your remote. Try unpairing Moxie from your remote first and then pair it to your smartphone. To unpair your remote, hold down any button for 5 seconds. The LED on the remote will flash and then go off once the 5 second mark has been reached.

Advanced security with Bluetooth bonding

Bluetooth bonding provides advanced security that prevents other signals from disrupting your wireless connection. This means that Moxie pairs with and trusts only two controllers (phones and/or remotes). Moxie will recognize and trust two controllers but only connects and pairs with one controller at a time.

To change one or both of the trusted controllers, reset Moxie:

1. Hold Moxie's control button down for 10 seconds — if Moxie is on, the LED will flash at the 5-second mark and then flash quickly once you've reached 10 seconds.
2. Remove Moxie from your Bluetooth device list on your phone.
3. Pair Moxie with the new controller (phone or remote).

Jive

Pair Jive with your smartphone. Hold down Jive's control button for 5 seconds (until Jive pulses twice). You can then begin the pairing process within the We-Connect app.

Nova 2

Pair Nova 2 with your smartphone. Hold down Nova's toggle button for 5 seconds. The LED will start flashing. You can then begin the pairing process within the We-Connect app.

Rave

Pair Rave with your smartphone. Hold down Rave's power button for 5 seconds (until Rave pulses twice). You can then begin the pairing process within the We-Connect app.

Bloom

Pair Bloom with your smartphone. Hold down Bloom's control button for 5 seconds (until Bloom pulses twice). You can then begin the pairing process within the We-Connect app.

Pivot

Pair Ditto with your smartphone. Hold down Ditto's control button for 5 seconds (until Ditto pulses twice). You can then begin the pairing process within the We-Connect app.

Verge

Pair Verge with your smartphone. Hold down Verge's control button for 5 seconds (until Verge pulses twice). You can then begin the pairing process within the We-Connect app.

Vector

Pair Vector with your smartphone. Hold down Vector's control button for 5 seconds. You can then begin the pairing process within the We-Connect app.

Users may need to remove Vector from the Bluetooth settings on their phone. Once removed from the Bluetooth list, reset Vector by pressing and holding the + button for 10-15 seconds. Once reset, you can pair Vector to the We-Connect app by clicking on "Connect toy" within the app.

Advanced security with Bluetooth bonding

Bluetooth bonding provides advanced security that prevents other signals from disrupting your wireless connection. This means that Vector pairs with and trusts only two controllers (phones and/or remotes). Vector will recognize and trust two controllers but only connects and pairs with one controller at a time..

To change one or both of the trusted controllers, reset Vector:

1. Hold Vector's control button down for 10 seconds — if Vector is on, the LED will flash at the 5-second mark and then flash quickly once you've reached 10 seconds.
2. Remove Vector from your Bluetooth device list on your phone.
3. Pair Vector with the new controller (phone or remote).

Ditto

Pair Ditto with your smartphone. Hold down Ditto's control button for 5 seconds (until Ditto pulses twice). You can then begin the pairing process within the We-Connect app.

Bond

Pair Bond with your smartphone. Press and hold the We-Vibe button for 5 seconds (until Bond pulses twice). You can then begin the pairing process within the We-Connect app.
