

# WOMANIZER™ CLASSIC

## What is it?

**Womanizer™ Classic** is a clitoral stimulator. Womanizer products are made with the revolutionary and unique technology called **Pleasure Air™**. Pleasure Air works by gently and indirectly, stimulating the clitoris.

## What do you need to know?

**Womanizer Classic** is for Womanizer beginners, who are already experienced sextoy users and Starlet is not an option for them as they want to experience a variety of intensity levels.

## How to demo?

1. Initiate the demo by telling your audience that you are about to be trained on the product that has everyone raving about how easily it brings them to orgasm.
2. Let them know that the Classic is one level down from the Premium with a few differences in features to accommodate the lower price point.
3. Turn on the Womanizer Classic and illustrate the **LED light** that indicates the product is on. If the LED light is flashing, that is to indicate that it requires charging. During charging the LED will flash and once it is fully charged it will stop flashing. Additionally, as you change intensity levels, the LED lights will illustrate this as well.
4. Next demonstrate the (+) and (-) buttons and cycle through all **8 intensity levels** illustrating the various intensities from 1 through 8.
5. Demonstrate the **two different sized stimulator heads** that come with the product (14 mm and 10 mm). The two different sizes of stimulator heads were developed not only to accommodate body diversity (covering 99% of clitoris sizes). The other reason is that the amount of pressure that is applied when in use is dependant on the volume of air that is within the head. If you use the larger head, there will be more space for the air pressure, and therefore less intensity. Alternatively, the smaller head will have less space for the air pressure and therefore generate more intensity.
6. Place one of the heads on the Womanizer Classic, and then illustrate how **Pleasure Air Technology** works by placing your palm on the stimulator head.
  - a. Explain how this technology is the first clitoral stimulator of its kind. The Classic uses Womanizer's revolutionary Pleasure Air Technology developed to, gently and indirectly, stimulate the clitoris. It produces sucking and massaging changes in air pressure, so that orgasm can be reached.
  - b. Mention how some people have experienced issues with some of the similar products in this category because they are solely suction, and have been too intense causing pain and even marking (like a hickey!).

# WOMANIZER™ CLASSIC

- c. Show how it sounds with the two different sized stimulator heads, illustrating that the more space there is around the clitoris, the less pressure will be felt within the head.
  - i. This is a great time to point out the **Super Silent Motor** and how this too is a big differentiator for the Classic.
  - ii. Show how it may sound loud at first but once it is placed into contact with the body, it becomes much quieter.

- 7. Now that we have gone through the product and how it works, let's go through the remaining features of the product
  - a. It has been made using only body-safe, ABS plastic and silicone. The silicone is hypoallergenic and medical grade.
  - b. The shape of the Womanizer Classic makes it easy to use and hold for both solo and partner use as it is sleek enough to fit between you and your partner
  - c. It is 100% waterproof
  - d. It is rechargeable and comes with a USB Cable with magnetic charging
  - e. The charge time is 2 hours
  - f. The run time is 4 hours
  - g. It is available in 1 colour (Dark Purple)

## Product Specifications

**Colour:** Dark Purple

**Battery Type:** Rechargeable lithium ion

**Material:** Medical grade silicone, body-safe ABS plastic

**Product Dimensions:** 148mm x 48mm x 35mm

**Product Weight:** 110g

**Packaging Dimensions:** 195mm x 156mm x 65mm

**Packaging Weight:** 440g

**Package Contains:** Womanizer™ Classic, 10mm head, 14mm head, charging cable, storage bag, manual

**Warranty:** 2 years
